EXAMINER

NOVOSAD, CHRISTOPHER J

ART UNIT	PAPER NUMBER
----------	--------------

3671

DATE MAILED: 02/17/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/621,736	Applicant(s) POWELL, DUANE WILLIAM	
	Examiner Christopher J. Novosad	Art Unit 3671	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 December 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 is/are pending in the application.
- 4a) Of the above claim(s) 6-8 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-5 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 1-5 drawn to Species I, Figs. 1-4 in the reply filed on December 28, 2004 is acknowledged. Accordingly, claims 6-8 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation "a first lower hook" in claim 1, line 7 and "a second lower hook" in line 8 is indefinite since it is unclear what hook is supposed to be lower than what other hook. Figs. 1-4 show hook 56 being lower than hook 58 but by reciting both hooks as "lower" hooks it is unclear which hook is supposed to be lower than which other hook.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3671

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Horney.

With respect to claim 1, Horney shows a coupling mechanism 26 (Figs. 2-5) for a work vehicle T (Fig. 1), the coupling mechanism 26 (Figs. 2-5) having a frame 28 for mounting to the work vehicle T, the frame 28 having a cross member 28 and left and right side members 38,62 and 40,62, respectively, projecting from opposite ends (unnumbered) of the cross member 28, and having an upper implement coupling hook 42 mounted on the cross member 28, the improvement comprising:

a pair of attaching members 30,32, each 30,32 mounted to a respective one of the side members 38,62 and 40,62, respectively, each attaching member 30,32 comprising an elongated body 51,54,50 and 53,56,52, respectively, a first lower hook (53 and the member, unnumbered, between members 53 and 58 of member 32 (Fig. 2) in Fig. 5; 51 and the member, unnumbered, between members 51 and 58 of member 30, respectively) fixed to a first end 53,51, respectively of the body 53,56,52 and 51,54,50, respectively, and a second lower hook 50a,52a fixed to a second end 50,52 of the body 51,54,50 and 53,56,52, respectively, the first lower hook (53 and the member, unnumbered, between members 53 and 58 of member 32 (Fig. 2) in Fig. 5; 51 and the member, unnumbered, between members 51 and 58 of member 30, respectively) having at least one dimensional feature (the member, unnumbered, between members 53 and 58 of member 32 in Fig. 5; the similar member, unnumbered, between members 51 and 58 of member 30, respectively) which is larger (greater in length) than a corresponding dimensional feature (unnumbered) of the second lower hook 52a,50a, respectively, each attaching member 30,32

Art Unit: 3671

being selectively mountable in (by being between members 38 and 62) a corresponding one of the side members 38,62 and 40,62, respectively in a first orientation with the first lower hook (53 and the member, unnumbered, between members 53 and 58 of member 32 (Fig. 2) in Fig. 5; 51 and the member, unnumbered, between members 51 and 58 of member 30, respectively) in an operative position and being selectively mountable in a second orientation with the second lower hook 50a,52a in an operative position.

Regarding claim 2, a first longer portion (unnumbered) of each attaching member 30,32 projects from a lower end of the corresponding side member 38,40 when the attaching member 30,32 is mounted to the corresponding side member 38,40 in the first orientation, and a second shorter portion (unnumbered) of each attaching member 30,32 projecting from a lower end of the corresponding side member 38,40 when the attaching member 30,32 is mounted to the corresponding side member 38,40 in the second orientation.

As to claim 3, a plurality of mounting bores 60,62a,64 extend through each attaching member 30,32; and

a plurality of coupling bores 60,62a,64 extend through each side member 38,40, a first group of the mounting bores 60,62a,64 being aligned with a first set of the coupling bores 60,62a,64 when the attaching member 30,32 is in the first orientation, a second group of the mounting bores 60,62a,64 being aligned with a second set of the coupling bores 60,62a,64 when the attaching member 30,32 is in the second orientation.

With respect to claim 4, the first (53 and the member, unnumbered, between members 53 and 58 of member 32 (Fig. 2) in Fig. 5; 51 and the member, unnumbered, between members 51

Art Unit: 3671

and 58 of member 30, respectively) and second 50a,52a lower hooks have prongs (unnumbered) which project from opposite sides of the elongated body 51,54,50 and 53,56,52, respectively.

Regarding claim 5, the first (53 and the member, unnumbered, between members 53 and 58 of member 32 (Fig. 2) in Fig. 5; 51 and the member, unnumbered, between members 51 and 58 of member 30, respectively) and second 50a,52a lower hooks have prongs (unnumbered) which project from opposite sides of the elongated body 51,54,50 and 53,56,52, respectively and generally towards a plane (not shown but necessarily present) which necessarily bisects a central portion of the elongated body at an angle.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher J. Novosad whose telephone number is 703-308-2246. The examiner can normally be reached on Monday-Thursday 5:30am-4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Will can be reached at 703-308-3870. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
